Bryce Canyon National Park

Bryce Canyon National Park is an American national park located in southwestern Utah. The major feature of the park is Bryce Canyon, which despite its name, is not a canyon, but a collection of giant natural amphitheaters along the eastern side of the Paunsaugunt Plateau. Bryce is distinctive due to geological structures called hoodoos, formed by frost weathering and stream erosion of the river and lake bed sedimentary rocks. The red, orange, and white colors of the rocks provide spectacular views for park visitors.

Seven Magic Mountains

Across the desert south of Las Vegas, Nevada, rises a large, colorful anomaly. Seven colossal stone forms defy gravity with their teetering formations. Mediating between geological formations and abstract compositions, Rondinone's Seven Magic Mountains consists of locally-sourced limestone boulders stacked vertically in groups ranging between three and six. Each stone boasts a different fluorescent color; each individual totem stands between thirty and thirty-

five feet high. The artwork extends Rondinone’s long-running interest in natural phenomena and their reformulation in art.

Outlets at Barstow

Barstow Outlets is located in the desert, on the only way from Las Vegas to Los Angeles. There are not many first tier luxury brands in this Outlets, but second tier brands, especially local brands in the United States, are relatively complete and concentrated, and the service is also quite good, which makes it a comfortable experience.
