Duration: Approx. 3 Hours

- Grand Prismatic Hot Spring

The third largest hot spring in the world, the Grand Prismatic Hot Spring gets its color from bacteria around its rim that feed off of the mineral-rich water. In the summer months, the hot spring is a vivid red-orange shade.

Duration: Approx. 40 Minutes

- Old Faithful Geyser

Old Faithful is a cone geyser in the Upper Geyser Basin of Yellowstone National Park. It is one of the park's most well-known natural features, and is famous for its predictability. It generally erupts every 91 minutes.

Duration: Approx. 1 Hour

- West Thumb Geyser Basin

The West Thumb Geyser Basin is the largest geyser basin at Yellowstone Lake, and an impressive area of geothermal activity that contains hot springs, mud pots, and geysers-- some of which are even in the lake itself.

Duration: Approx. 45 Minutes

- Fountain Paint Pot

Fountain Paint Pot, heated by the region's underground hot springs, F.P.P is half hot spring, half mud basin. The spring releases natural shades of red and yellow because of the oxidation of iron in the soil.

- Yellowstone Lake

Yellowstone Lake isn't just the largest single body of water in Yellowstone National Park, but the largest elevated freshwater lake in the US. The lake contains several underwater hot springs that melt its otherwise thick ice sheets in the winter.
