### **Zion National Park**

A dream destination for hikers and photographers, Zion National Park may be located in the desert, but its terrain is anything but barren. Formed over millions of years of erosion, the park's myriad rock formations, numerous wilderness trails, and unique wildlife beckon visitors seeking solitude and inspiration. The park's many canyons, animal communities, and cultural sites are perfect for exploring in any season, but spring and fall are when the weather is most pleasant and the flowers are in full bloom.

### **Bryce Canyon National Park**

Bryce Canyon National Park, located in southwestern Utah, is not a true canyon, despite its name. Instead, it forms a vast natural amphitheater formed by erosion along the eastern face of the Ponsagant Plateau. Its unique geological formations, known as rock pillars, are formed by wind, river water, and ice erosion, along with sedimentary rocks from lakebeds. The red, orange, and white rocks within these formations create a unique natural landscape, earning it the nickname "Palace of Natural Stone Figurines."

National Park. As the world's largest concentration of natural sandstone arches, Arches National Park covers an area of about 309 square kilometers and has more than 2,000 natural rock arches. The arches that we see today have withstood thousands of years of wind and rain erosion in various strange postures, and still stand proudly on this salt layer, which is breathtaking.

### **Canyonlands National Park**

Canyonlands National Park is an American national park located in southeastern Utah near the town of Moab. The park preserves a colorful landscape eroded into numerous canyons, mesas, and buttes by the Colorado River, the Green River, and their respective tributaries. While these areas share a primitive desert atmosphere, each retains its own character. The Island in the Sky mesa rests on sheer sandstone cliffs towering over 1,000 feet (304 m) above the surrounding terrain. Every overlook offers a different perspective on Canyonlands' spectacular landscape. Island in the Sky is the easiest area of Canyonlands to visit in a short period of time, offering many pullouts with spectacular views along the paved scenic drive.

### **Arches National Park**

Arches National Park is located near the town of Moab in Utah, USA. It covers an area of 309 square kilometers and preserves more than 2,000 natural rock arches. About 300 million years ago, this salt layer was an ocean. Millions of years after the sea disappeared, the salt layer was covered by air and water debris, and squeezed into rock with other debris. Later, after the crust uplifted and natural weathering, it became the arches of today. The park not only has arches, but also numerous large and small spires, pedestals, balancing stones and other unique geological features; all the stones have textures with very strong color contrasts.

## Day 4

### Monument Valley - Vehicle - Horseshoe Bend - Vehicle - Antelope Canyon

Morning Breakfast

#### Breakfast Included

All day

Friends who are interested in western blockbusters are in luck. Today we will go to Monument Valley. Monument Valley frequently appears in movies and is a symbol of the original American West. The cross-country long-distance race in "Forrest Gump" ends here. Then go to Horseshoe Bend, a famous photography spot selected by American National Geographic Magazine. The river turns 360 degrees in the reddish-brown canyon, cutting out a horseshoe[1]shaped canyon, which is why Horseshoe Bend got its name. Finally, we will visit the peculiar slit cave, the Lower Antelope Canyon, one of the top ten photography spots in the world. The rock walls of the cave are a perfect wave shape that combines the erosion of wind and torrents for thousands of years. It is an abstract painting of nature. The cave has always been a pure place for Navajo Indians to sit and think deeply. They believe that they can listen to the voice of God here. Stay overnight in Tuba, an Indian reservation.

#### Itinerary:

**Blanding** → **Monument Valley** (Mandatory, 120 mins, optional for visit by Jeep) → **Horseshoe Bend** (Mandatory, 75 mins) → **Antelope Canyon** (Optional, 120 mins) → **Tuba City**

#### Kindly Reminder:

## **Monument Valley**

Monument Valley is a region of the Colorado Plateau characterized by a cluster of vast sandstone buttes, the largest reaching 1,000 ft above the valley floor. It is located on the Arizona–Utah state line, near the Four Corners area. Monument Valley has been featured in many forms of media since the 1930s. Director John Ford used the location for a number of his best-known films and thus, in the words of critic Keith Phipps, "its five square miles [13 square kilometers] have defined what decades of moviegoers think of when they imagine the American West."

Morning Transportation: Drive from Monument Valley to Horseshoe Bend

Travel distance: 125mi Travel time: 2Hour

Afternoon

## **Horseshoe Bend**

Horseshoe Bend – One of the top ten best photography spots in the United States selected by National Geographic Magazine! The dense aquatic plants on the Colorado River bed make the river water appear fluorescent green in the sun. The river turns 360 degrees in the reddish-brown canyon here, cutting out a horseshoe-shaped canyon, hence the name Horseshoe Bend. Standing on the edge of the cliff, you will be intoxicated by the breathtaking beauty of the blue water, blue sky and red rocks.

Afternoon Transportation: Drive from Horseshoe Bend to Lower Antelope Canyon

Travel distance: 10mi Travel time: 20Minute

Afternoon

## **Lower Antelope Canyon**

The Lower Antelope Canyon is located in the north of Arizona, USA. It is formed by soft sandstone after millions of years of various erosion forces. Flash floods often flow into the canyon during the monsoon season. Due to the sudden increase in rainfall, the flow rate of the flash flood is quite fast. In addition, the narrow channel narrows the river channel, so the vertical erosion force is relatively large, forming the corridor at the bottom of the Lower Antelope Canyon and the hard and smooth edges on the valley wall that look like flowing water. There is no artificial lighting in the Lower Antelope Canyon. All visible light comes from the cracks at the top of the canyon. These lights are repeatedly refracted by the rock texture and enter the valley bottom, producing a dreamy and irregular color change. These colors are from deep to light, colorful and beautiful.
