Zion National Park

A dream destination for hikers and photographers, Zion National Park may be located in the desert, but its terrain is anything but barren. Formed over millions of years of erosion, the park's myriad rock formations, numerous wilderness trails, and unique wildlife beckon visitors seeking solitude and inspiration. The park's many canyons, animal communities, and cultural sites are perfect for exploring in any season, but spring and fall are when the weather is most pleasant and the flowers are in full bloom.

Bryce Canyon National Park

Bryce Canyon National Park, located in southwestern Utah, is not a true canyon, despite its name. Instead, it forms a vast natural amphitheater formed by erosion along the eastern face of the Ponsagant Plateau. Its unique geological formations, known as rock pillars, are formed by wind, river water, and ice erosion, along with sedimentary rocks from lakebeds. The red, orange, and white rocks within these formations create a unique natural landscape, earning it the nickname "Palace of Natural Stone Figurines."

Canyonlands National Park

Canyonlands National Park is an American national park located in southeastern Utah near the town of Moab. The park preserves a colorful landscape eroded into numerous canyons, mesas, and buttes by the Colorado River, the Green River, and their respective tributaries. While these areas share a primitive desert atmosphere, each retains its own character. The Island in the Sky mesa rests on sheer sandstone cliffs towering over 1,000 feet (304 m) above the surrounding terrain. Every overlook offers a different perspective on Canyonlands' spectacular landscape. Island in the Sky is the easiest area of Canyonlands to visit in a short period of time, offering many pullouts with spectacular views along the paved scenic drive.

Arches National Park

Arches National Park is located near the town of Moab in Utah, USA. It covers an area of 309 square kilometers and preserves more than 2,000 natural rock arches. About 300 million years ago, this salt layer was an ocean. Millions of years after the sea disappeared, the salt layer was covered by air and water debris, and squeezed into rock with other debris. Later, after the crust uplifted and natural weathering, it became the arches of today. The park not only has arches, but also numerous large and small spires, pedestals, balancing stones and other unique geological features; all the stones have textures with very strong color contrasts.

Monument Valley - Vehicle - Horseshoe Bend - Vehicle - Antelope Canyon

Morning Breakfast

Breakfast Included

All day

Friends who are interested in western blockbusters are in luck. Today we will go to Monument Valley. Monument Valley frequently appears in movies and is a symbol of the original American West. The cross-country long-distance race in "Forrest Gump" ends here. Then go to Horseshoe Bend, a famous photography spot selected by American National Geographic Magazine. The river turns 360 degrees in the reddish-brown canyon, cutting out a horseshoe[1]shaped canyon, which is why Horseshoe Bend got its name. Finally, we will visit the peculiar slit cave, the Lower Antelope Canyon, one of the top ten photography spots in the world. The rock walls of the cave are a perfect wave shape that combines the erosion of wind and torrents for thousands of years. It is an abstract painting of nature. The cave has always been a pure place for Navajo Indians to sit and think deeply. They believe that they can listen to the voice of God here. Stay overnight in Tuba, an Indian reservation.

Itinerary:

Blanding → Monument Valley (Mandatory, 120 mins, optional for visit by Jeep) → **Horseshoe Bend** (Mandatory, 75 mins) → **Antelope Canyon** (Optional, 120 mins) → **Tuba City**

Kindly Reminder:

1. Lower Antelope Canyon will be closed for maintenance during 01/12/2026-01/18/2026. Affected by this, the original itinerary during this period will be adjusted to: Antelope Canyon X (Optional, 120 mins).
2. To ensure children's safety, Antelope Canyon X explicitly stipulates: When children aged 0-8 visit, they must be accompanied by a guardian with a self-provided safety seat. Children who fail to bring a safety seat as required will not be allowed to enter. Thank you for your understanding.

Monument Valley

Monument Valley is a region of the Colorado Plateau characterized by a cluster of vast sandstone buttes, the largest reaching 1,000 ft above the valley floor. It is located on the Arizona–Utah state line, near the Four Corners area. Monument Valley has been featured in many forms of media since the 1930s. Director John Ford used the location for a number of his best-known films and thus, in the words of critic Keith Phipps, "its five square miles [13 square kilometers] have defined what decades of moviegoers think of when they imagine the American West."

Horseshoe Bend

Horseshoe Bend – One of the top ten best photography spots in the United States selected by National Geographic Magazine! The dense aquatic plants on the Colorado River bed make the river water appear fluorescent green in the sun. The river turns 360 degrees in the reddish-brown canyon here, cutting out a horseshoe-shaped canyon, hence the name Horseshoe Bend. Standing on the edge of the cliff, you will be intoxicated by the breathtaking beauty of the blue water, blue sky and red rocks.

Afternoon

Lower Antelope Canyon

The Lower Antelope Canyon is located in the north of Arizona, USA. It is formed by soft sandstone after millions of years of various erosion forces. Flash floods often flow into the canyon during the monsoon season. Due to the sudden increase in rainfall, the flow rate of the flash flood is quite fast. In addition, the narrow channel narrows the river channel, so the vertical erosion force is relatively large, forming the corridor at the bottom of the Lower Antelope Canyon and the hard and smooth edges on the valley wall that look like flowing water. There is no artificial lighting in the Lower Antelope Canyon. All visible light comes from the cracks at the top of the canyon. These lights are repeatedly refracted by the rock texture and enter the valley bottom, producing a dreamy and irregular color change. These colors are from deep to light, colorful and beautiful.

All day

Golden Gate Bridge

The Golden Gate Bridge is one of the world's largest single-span suspension bridges and is considered a symbol of San Francisco. Spanning 2.7 kilometers, it spans the entire San Francisco Bay and the Golden Gate Strait in the Pacific Ocean, serving as a vital transportation hub connecting San Francisco with cities to the north. American blockbusters such as "Rise of the Planet of the Apes" and "X-Men" have also been filmed here.

Palace of Fine Art

The San Francisco Palace of Fine Arts was built in 1915 for the Panama Pacific International Exposition. After the conference, the Palace of Fine Arts gradually fell into disuse and eventually became a ruin. It was not until 1962 that the famous German architect Maybeck redesigned and renovated it, giving it a second youthful beauty.

Lombard Street

Lombard Street is known as the "world's most crooked street". Many movies such as "Venom" have filmed racing scenes here. It is one of the most popular landmarks in San Francisco. Every year, millions of tourists walk or drive through its eight sharp turns. It is surrounded by the mansions of Russian Hill, well-manicured landscapes and flowers, and is also one of the most scenic streets in the city. From the top of the mountain, you can overlook the breathtaking view of San Francisco Bay, the Bay Bridge and Coit Tower.

San Francisco Fisherman's Wharf

Fisherman's Wharf is a household name in San Francisco. Starting from Ghirardelli Square and extending to Pier 35, you can see the busiest Pier 39 with its various shops, restaurants, and street performances, as well as the views of Alcatraz, the Golden Gate Bridge, and the Bay Bridge.

San Francisco Bay Cruise

The beautiful Golden Gate Bridge and the spectacular Oakland Bay Bridge are the faces of San Francisco. You can visit these two attractions one by one by taking a cruise. The cruise passes under the beautiful bridge, and you can feel the sea breeze on your face and feel relaxed and happy. You can also get a close look at the spectacular scenery of Alcatraz Island. Such a trip will definitely bring you very good memories.

San Francisco Civic Center Plaza

San Francisco Civic Center Plaza, also known as Joseph L. Alioto Plaza, is situated in the heart of downtown San

Francisco. It stretches north to City Hall, south to Fulton Plaza, and east to the California State Supreme Court building. The area showcases a variety of architectural styles, with City Hall—constructed in 1915 in the French Renaissance design—serving as its iconic centerpiece. Additionally, the plaza functions as a cultural and artistic hub, home to premier performance venues such as the Louise M. Davies Symphony Hall.

Twin Peaks

The two hills, about 270 meters above sea level, are also the only natural hills preserved in San Francisco. They are famous for their 360-degree panoramic views. Twin Peaks are the two main commanding heights in San Francisco, and there is an 8-shaped road surrounding the two peaks. The mountaintop observation deck here has a panoramic view of the beauty of San Francisco because there are no dense trees blocking it. Looking down from the peak, the bustling San Francisco city view and the charming bay scenery will make you intoxicated.
