Las Vegas Night View Tour

When night falls and the lights come on, the gambling city is a sea of neon lights and a colorful world of light and shadow. The electricity consumption of the five-kilometer-long Las Vegas Strip in one night can supply a city of 500,000 people with electricity for a year. The architecture here is a fusion of the best from all over the world. It is a well-deserved miracle of human engineering and the city with the most American characteristics!

Day 2

Las Vegas - Vehicle - Lower Antelope Canyon - Vehicle - Horseshoe Bend - Vehicle - Las Vegas

All day

In the morning, we'll drive to Lower Antelope Canyon, passing Lake Powell, the origin of the Grand Canyon. We'll then enter Lower Antelope Canyon, one of the world's most unique slot caves and one of the world's top ten photography locations. Following our Navajo Indian guide, we'll explore the caverns. The cavern walls, shaped by centuries of wind and water, have been shaped into perfect waves, creating an abstract masterpiece of nature. We'll then visit Horseshoe Bend, recognized by National Geographic as one of the top ten photography locations in the United States. Afterwards, we'll return to Las Vegas.

Itinerary:

Las Vegas → **Lower Antelope Canyon** (Mandatory, 2 hours) → **Horseshoe Bend** (Mandatory, 1 hours) → **Las Vegas**

Kindly Reminder:

1. Lower Antelope Canyon will be closed for maintenance during 01/12/2026-01/18/2026. Affected by this, the original itinerary during this period will be adjusted to: Antelope Canyon X (Mandatory, 2 hours).
2. To ensure children's safety, Antelope Canyon X explicitly stipulates: When children aged 0-8 visit, they must be accompanied by a guardian with a self-provided safety seat. Children who fail to bring a safety seat as required will not be allowed to enter. Thank you for your understanding.

All day

Lower Antelope Canyon

The Lower Antelope Canyon is located in the north of Arizona, USA. It is formed by soft sandstone after millions of years of various erosion forces. Flash floods often flow into the canyon during the monsoon season. Due to the sudden increase in rainfall, the flow rate of the flash flood is quite fast. In addition, the narrow channel narrows the river channel, so the vertical erosion force is relatively large, forming the corridor at the bottom of the Lower Antelope Canyon and the hard and smooth edges on the valley wall that look like flowing water. There is no artificial lighting in the Lower Antelope Canyon. All visible light comes from the cracks at the top of the canyon. These lights are repeatedly refracted by the rock texture and enter the valley bottom, producing a dreamy and irregular color change. These colors are from deep to light, colorful and beautiful.

Horseshoe Bend

Horseshoe Bend – One of the top ten best photography spots in the United States selected by National Geographic Magazine! The dense aquatic plants on the Colorado River bed make the river water appear fluorescent green in the sun. The river turns 360 degrees in the reddish-brown canyon here, cutting out a horseshoe-shaped canyon, hence the name Horseshoe Bend. Standing on the edge of the cliff, you will be intoxicated by the breathtaking beauty of the blue water, blue sky and red rocks.

Morning Transportation: Drive from Las Vegas to Seven Magic Mountains

Travel distance: 30mi Travel time: 30Minute

Morning

Seven Magic Mountains

Across the desert south of Las Vegas, Nevada, rises a large, colorful anomaly. Seven colossal stone forms defy gravity with their teetering formations. Mediating between geological formations and abstract compositions, Rondinone's Seven Magic Mountains consists of locally sourced limestone boulders stacked vertically in groups ranging between three and six. Each stone boasts a different fluorescent color, and each individual totem stands between thirty and thirty-five feet high. The artwork extends Rondinone's long-running interest in natural phenomena and their reformulation in art.
